BHP 101	DOUBLE FEATURE	OT RUBBER	36"	\$20.00
BHP 102	RYAN NAVION	RUBBER SCALE	30"	\$20.00

## BMJR MODELS

ALL BMJR KITS ARE LASER CUT. WE WILL STOCK MORE AS DEMAND PERMITS

### Dakota

### B-113

The "Dakota" was designed in September 1949 and was Joe Wagner's first design kitted. The Dakota was designed as a "foolproof" 1/2A free flight, and incorporated several features that provided automatic stability in flight. The BMJR kit includes all laser cut parts, except for the wing leading edges and the pre-bent landing gear wire. Everything needed to build this model is in the box except glue, engine and a fuel proof coating. BMJR is delighted to have had the opportunity to work with Joe on his re-release of a true all-time-classic.  
\$40.00

### Sniffer

### B-117

The Sniffer is an early Post War model designed for the new OK Cub or Anderson Spitfire small glow engines. It is reported that the name came from its thermal sniffing qualities which it still exhibits today. The BMJR Sniffer is true to the original form but has been engineered to take advantage of today's laser technology. With 139 square inches of wing area, the design is the perfect size for the PeeWee .020 engine and legal for early nostalgia competition, and the special PeeWee 30 event. However, it is best; flown just-for-fun.  
\$34.50

### J-Hawk

The J-Hawk was designed by Ray Combs in the 1950's and was approved for Nostalgia competition by the NFFS Nostalgia committee in 2007. Model is relatively small with a 35" span and only 232 sq. in. of wing area originally intended for a Wasp .049. Hand Launch Gliders influenced the design with a low aspect ratio of only 5 ½ and a thin flat bottom airfoil., producing a model with a fast climb. Flying weight is in the 6 oz. range, ideal for Early Nostalgia competition.

\$42.00

### B-121

### Kiwi-A

The thin flat-bottom airfoil of Goldberg's Comet Interceptor was the influence accredited to Lew Mahieu Kiwi design. As an employee of K&B in 1954 when the Torpedo Green Head 15 was introduced, Lew designed the 48" span 375 in.sq. Kiwi to meet the then FAI Free Flight rules with the new engine. The FAI Kiwi was K&B's first and only venture into the competition kit market which was eventually sold to Guillow. Having experience with the 1/2A Kiwi; when we acquired an OS Max 15, and remembering our K&B Kiwi go OOS from Fort Meyers FL in 1964 with a TD .15, we were ready for another A size Kiwi. fling weight of our Kiwi is 15.1 oz. The BMJR Kiwi-A is true to the original design with the only changes to accommodate laser cutting technology for ease of assembly. The BMJR Kiwi-A is perfect for NFFS class A Nostalgia and the new Vintage FAI event

### B-123

### T-Bird 600

The T-Bird 600 was inspired by Gene Wicks flying his 600 at Palm Bay. After developing the files for laser cutting the stab ribs, and under cambered wing ribs, we felt it only fair to offer these as a short kit to other modelers. Your kit contains the 13 laser cut parts sheets shown below and Full Size plans re-done in CAD from a well used set. A complete list of material needed to complete the model (less covering, engine, timer and tank) is included on sheet 2. Only deviation from the original plan has been to use 1/8 ply instead of 1/4 balsa for the dihedral braces and the recommendation of .007 carbon fiber on top and bottom of the spars. Also detail for wing hold down and stab dethermilizeer have been left to the discretion of the builder.

\$42.00

### B-125

### T-Bird 408

Russ Hanson designed the T-Bird in 1956 at 324 sq. in. for 1/2A. In the 1980's Ron Sharpton began "scaling" the design for Nostalgia Competition all the way up to a 1200 with a .McCoy 60. His 408 came out on top at the Nats 4 times. Several years ago, Russ and Ron approached me at Palm Bay about cutting a 408 kit. At the time we were just learning CAD and did not have our own laser and had to decline. Last year, Gene Wicks showed up with a copy of the original 408 "scaled " plan which was the inspiration we need for this model.

\$76.50

### B-126

### **1/2A Viking**

The BMJR version of Carl Goldberg's 1/2A Viking is scaled to 84% of the original by John Anderson for the National Free Flight Society one design competition at the 2011 Nats. Model retains all the lines of the original, and the same flight characteristics except for a faster climb. Kit also has exterior instead of center spars for a stiffer wing. Although the Viking designed in the 1960 is not Nostalgia legal, the one-design event is to be flown to Nostalgia rules, with any Nostalgia legal or TD.049 engine. Model has a 42: spa with area of 265 sq. in.

\$53.25

### **B-128**

### **Speckled-P-30**

The original Baby-Speckled Bird was designed by George Perryman and flown to a first place in P-30 at the 1978 Nat's with a time on 11 min, 13 sec. The BMJR Speckled-P30 is based on this original design in plan form but has been scaled up slightly to a 28" wingspan, with 134 sq. in. of area, and 30" fuselage length. The distinctive Speckled Bird lines have been retained but the structure has been changed to accommodate laser cutting technology for ease of construction, and to reduce weight where ever possible to achieve the 40 gram target weight of this larger model.

\$32.75

### **B-509**

### **Ranger-28**

Carl Goldberg did a great job designing this rubber powered sport free flight model This model is a hybrid with features of the sheet balsa models of the time, with tissue covered built up structure. The fuselage is assembled from laser cut parts much like a jigsaw puzzle, that then gets tissue covered. This is a great model to introduce modelers to the world of a tissue covered built up structure. And it flies Great. 28" spam with 102 sq. in area

\$37.50

### **B-510**

### **Jetstream**

Designed and flown by Warren Kurth winning the 1959, 1960 and 1961 Nationals, and setting an AMA record for A-1 tow-line gliders. Model has a 48 1/2" wing span with a total area of 269 sq. in. Kit #B-402

\$41.75

### **B-402**

# LASER CUT KITS FROM PECK POLYMERS

[Item Code: PP004](#)  
[STRINGLESS WONDER KIT](#)

Peck Polymers kit  
Wonderful beginner kit. Flying wing model that is easy to build and fly. Not laser cut.  
Our Price: 8.49

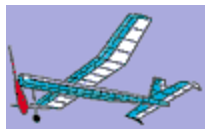

[Item Code: PP007-L](#)  
[Peanut Scale NESMITH COUGAR KIT \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!**  
13 inch wingspan balsa & tissue model made to fly  
Our Price: 19.95

[Item Code: PP013-L](#)  
[One Nite 16 16" Wingspan \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!**  
A small quick building sport flying outdoor duration plane  
Our Price: 19.95

[Item Code: PP014-L](#)  
[One Nite 28 P-30 kit 28" Wingspan \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!**  
An easy to build P30 outdoor duration plane  
Our Price: 24.95

[Item Code: PP032-L](#)  
[Convertible 32" span Old Timer ROG /ROW \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!** classic Rubber powered free flight kit with a 32" wingspan. Includes a 15 inch diameter balsa

[Item Code: PP005-L](#)  
[Peanut Scale Piper J3 Cub \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!** 13 inch wingspan balsa & tissue model made to fly  
Our Price: 19.95

[Item Code: PP010-L](#)  
[Peck R.O.G beginner Kit \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!** 10 inch wingspan Rise off Ground. A wonderful 1st plane..  
Our Price: 4.99

[Item Code: PP017-L](#)  
[Prairie Bird 16, 16" Wingspan \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!**  
16" wingspan. Designed for Embryo Endurance contests.  
A straight forward model that flies very well and is a terrific second model  
Our Price: 20.95

[Item Code: PP031-L](#)  
[Flying Ace "Moth" 24" Wingspan \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!** 24 inch wingspan old time cabin plane  
Our Price: 25.95

[Item Code: PP041-L](#)  
[SKYBUNNY outdoor sport kit \\*\\*LASER CUT\\*\\*](#)

Peck Polymers kit  
**LASER CUT!** 18" wingspan easy to adjust and a great flier.  
Our Price: 13.49

propeller blank and all necessary hardware to fly it either R.O.G (rise off ground) or R.O.W (rise off water).  
Our Price: 44.95

Item Code: PP018-L  
Peanut Scale LACEY M-10 Kit \*\*LASER CUT\*\*

Peck Polymers kit  
**LASER CUT!** 13 inch wingspan balsa & tissue model made to fly  
Our Price: 19.95

Item Code: PP021-L  
J3 KITTEN - 24" WINGSPAN \*\*LASER CUT\*\*

Peck Polymers kit  
**LASER CUT!**  
Can be built as a RC or a FF kit using rubber or electric power.  
Designed by Thayer Syme  
Our Price: 33.99

## FROM AL LIDBERG KITS

<b>NOT JUST ANOTHER PRETTY FACE</b>	<b>P-30 RUBBER</b>	<b>\$29.98</b>
<b>An easy to build pre cut kit !!!</b>		

**Discus launched glider kits by: Sting Aero**

[Item Code: STA011](#)

[Spin-Up 36 Discus Launched Glider Full Kit](#)

Sting Aero Products kit

**LASER CUT!**

The Spin-Up 36 Discus launched glider kit includes contest balsa parts, carbon fiber boom, carbon/glass reinforcements, carbon finger peg, and hardware. Full size plans, trimming and launching instructions are provided. A special step by step discus launching and trimming article by designer Mark Bennis is also included. **Smoothie Mk3 DT timer now included!**

Our Price: **\$89.95**

[Item Code: STA013](#)

[Spin-Up 42 Discus Launched Glider Full Kit](#)

Sting Aero Products kit

**LASER CUT!**

The Spin-Up 42 Discus launched glider kit includes contest balsa parts, carbon tailboom, carbon/glass cloth, carbon finger peg, and hardware. Full size plans, trimming and launching instructions are provided. A special step by step discus launching and trimming article by designer Mark Bennis is also included. **Smoothie Mk3 DT timer now included! AMA LEGAL! 42" flat span, 39.25" projected**

Our Price: **\$97.95**

**Moses Magnets**

These tiny to miniscule size magnets are nickel plated rare earth magnets used by model builders for securing removable wings, nose blocks, or other plane parts that will survive a hard landing because they simply detach from the fuselage upon impact. Although very small and light, these magnets are extremely powerful.

3/16" Diameter x 1/32" Thickness, wt. 0.12 grams,
